To complete the installation follow these steps:

1. You will be presented with the V-Ray licensing agreement. Please take a moment to review the [agreement](#). Check the **I accept** checkbox and click **Next** to proceed:

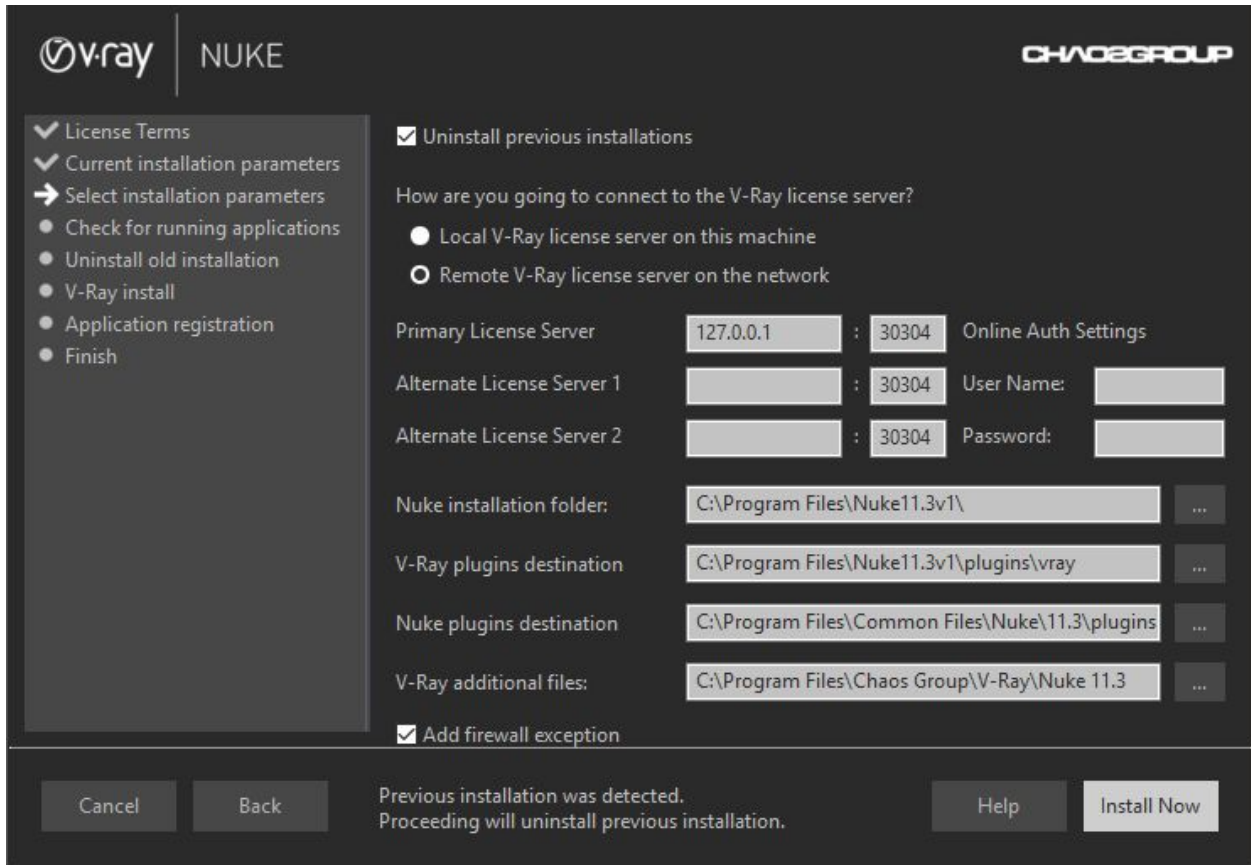

2. During the next step, you can press the **Customize** button and adjust the corresponding installation settings, if needed. The installer will detect and list if any applications need to be closed. Please close them and click **Install Now**.

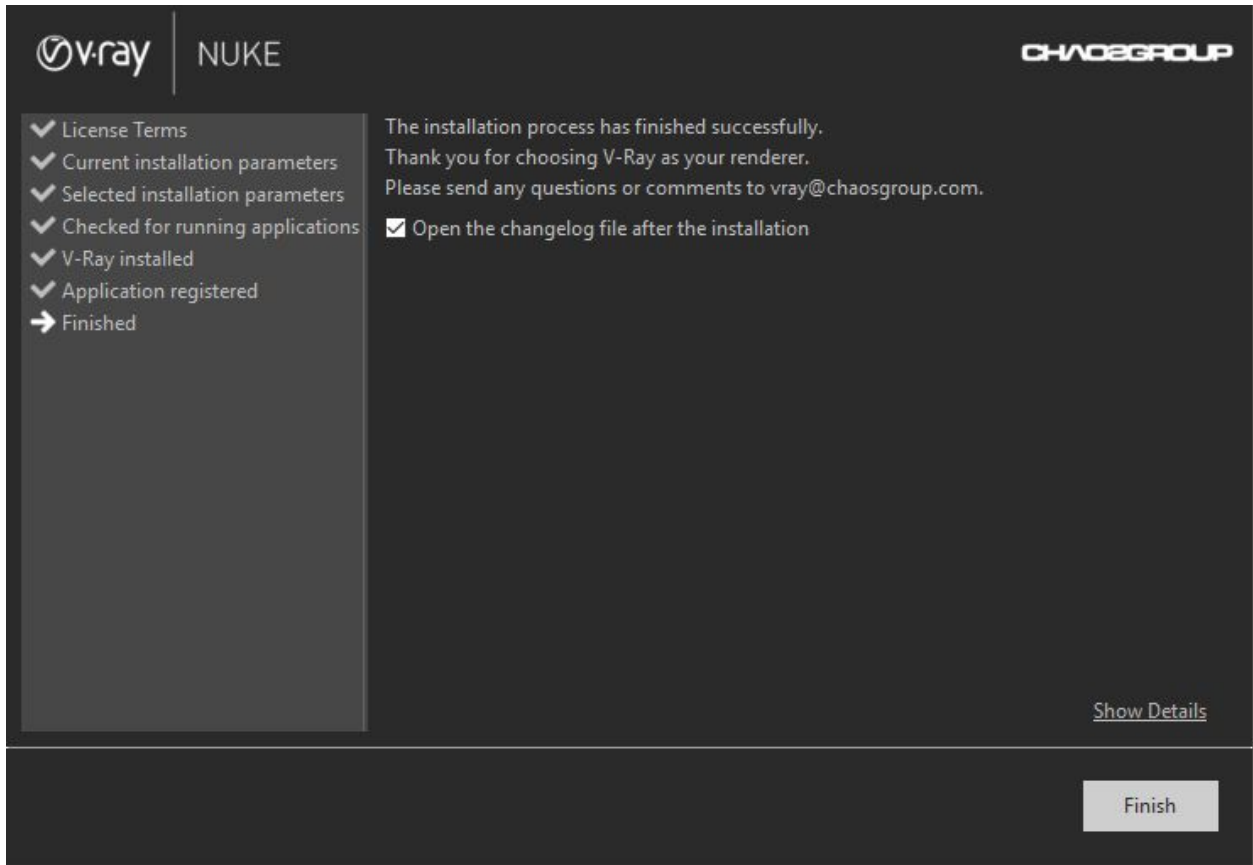

3. If you have pressed the **Customize** button, you will be able to adjust some installation settings:

- **Uninstall previous installations** – Leave this checked to automatically uninstall any previous installations.
- **How are you going to connect to the V-Ray license server** – Specifies whether the V-Ray license server will run locally or on another machine. If you select “Remote V-Ray license server on the network” you will be given fields to specify the IP address of the machine on which the V-Ray License server is running. Please leave the port 30304 unchanged.
- **Specify installation paths** – Please check if the default folders are correct.

4. The installer will proceed to uninstall any previous versions and install V-Ray.

5. If the installation was successful, you will get this screen:

Press the **Finish** button and move on to making sure your license is configured. For more information, see how to set [up your V-Ray License](#).
